

Peace of Mind.

What You And Your Guests Have With On-Line Security.

Around-the-Clock Access Management by Access-Plus® with Sensor-Lock™

On-line access control increases hotel security in three important ways.

First, on-line access is more secure than off-line door locks. Keycards are validated and voided instantly at the front desk. Second, Sensor-Lock™ provides "request to exit" data and gives the deadbolt status of every room. Lastly, your entire system is kept secure with password auditing controls built into the central computer.

Call us today about this full-featured and reliable system. Put us head-to-head with our competitor and see that we provide unique services and the best value in on-line access control. When you have Access-Plus, both you and your guests get a good night's sleep.

Access-Plus® On-Line Benefits:

Streamline Check-In/Check-Out with front-desk validating and voiding of keycards. Eliminate the hassle of re-keying door-by-door.

Credit Card Keying gives your guests the option to simplify by turning their credit cards into access keycards.

Sensor-Lock™ exclusively by Security Innovations, Inc., tells you if and when the deadbolt has been thrown in each and every room.

Conserve Energy by regulating heating and air conditioning from the front desk. Optional on-line motion sensors available.

Track Staff Productivity and limit access of employees to their work areas and work hours.

Secure Passwords with central auditing. Keep record of computer users and altered data.

Prevent Crime by voiding lost or stolen keycards with the push of a button.
