

REAL ON-LINE. REAL SECURITY.

THERE IS A REAL DIFFERENCE.

Why is it that some companies claim to have "on-line" capabilities when they do not? Simple. They know *real* on-line security provides a superior locking system. On-line access control is safer, more reliable and more responsive than stand-alone electronic door locks. Access-Plus® by SII has excellent standard on-line features and a variety of options to maximize the security of your clientele, staff and property:

- Real-time transaction reports for immediate response
- Create and delete guest and employee card keys instantly without leaving the front desk
- Sensor-Lock™ technology alerts front desk when doors are forced or left open
- Credit Card Keying for faster and easier check-in
- Ability to utilize multiple reader technologies (biometric, PIN pad, proximity, magstripe)
- Optional secondary annunciation of smoke detection
- Optional paging alerts
- Optional energy management controls save on lighting and air-conditioning costs

Contact us today and let us demonstrate the real difference between high-quality on-line security and, well, everything else.
