

THIS ONE'S ON YOU

...or didn't you
know?

Your valuables are ripe for the taking
if you don't have on-line access control.

It's 3:00 in the morning
and someone is trying to get into the storeroom.

A card key is swiped at the door. The door handle turns.
A person enters. WHO IS IT?

With Access-Plus, you will know.

The moment the card key is used, the central computer records whose card it is. If the card was previously stolen and reported, it will be refused.

If the door is forced open, an alarm will sound.

And every time a person walks into the storeroom, the CCTV records the activity at the front desk.

On-line access control relays information to the front desk for the quickest response in the event of a security breach. Off-line systems can only be audited *after* the fact. With Access-Plus, you have the ability to call police while a crime is taking place to better protect your guests, your employees and your assets.

Call today for information on *real* on-line security and get control of your business with Access-Plus.

FEATURES AND BENEFITS

- Integrates with Closed-Circuit TV to record activity
- Sensor-Lock™ technology alerts front desk when doors are forced or left open
- Real-time transaction reports for immediate response
- Create and delete guest and employee card keys without leaving the front desk
